SUMMARY

UI/UX Designer and Web Developer with experience designing responsive interfaces and building websites using HTML/CSS/JS, React, and Next.js. I focus on clear structure, usability, and developer-ready design handoff (components, style guides, and assets). Motivated by long-term collaboration, especially on projects where design directly improves user experience.

SKILLS

- **UI/UX Design:** from prototype to final product (desktop-first + mobile adaptation)
- **Figma:** wireframes, interactive prototypes, UI kits, components, design systems
- **Front-End:** HTML/CSS/JS, React.js, Next.js, React Native
- **AI in real projects:** practical use of AI tools in design and development workflows
- **Git:** confident daily use, branching, collaboration, and version control

EXPERIENCE

Web Developer / UI-UX Designer

2024

Drinkers Startup

- Designed UI/UX for web pages and flows: requirements analysis, user needs, wireframes, prototypes, final UI.
- Built responsive websites with HTML/CSS/JS, React, and Next.js while improving visual consistency using reusable components.
- Prepared developer-ready files: style guides, assets, and structured layouts for efficient implementation.

UI/UX Designer

2024-2026

SaleRow Software

- Designed interfaces and user flows for web and mobile products.
- Created wireframes, prototypes, and UI systems for product implementation.
